FORCE OF NATURE

Ordinary people with an  
**extraordinary passion**  
to save our planet

*Have you ever thought about  
the future of **OUR planet?***

**You do not have to look too deep into the health  
of our planet to see evidence that **our earth**  
**needs OUR help****

*Have YOU ever wondered, what if there was something **YOU** could do to **help**?*

The reality is, as humans, we are the **ONLY INHABITANTS** on earth that can **INITIATE POSITIVE CHANGE** to heal our planet and learn from past mistakes

**NETFLIX**

Let there be **hope**

Few of us know *HOW* we can really  
make a difference ... **until NOW**

Introducing **EcoForce Global**  
- *saving the planet one tree at a time*

# *EcoForce Global Founders:* *Charles and Tracy Alder*

2015 created charity; *Rural Aid*

*Buy-A-Bale Fundraising Program* raised over \$100 million

**OPPORTUNITY** for Farmers to **capture CO2** by changing  
farming practices and **repairing OUR PLANET**

# EcoForce Global **Mission**

*“**Empowering people** through knowledge and action to plant enough trees to sequester (capture) 30% of the world’s annual carbon output through intelligent and sustainable **planting of trees** to reduce the effects of global warming and create a **living legacy** for all”*

**Our First Goal:**

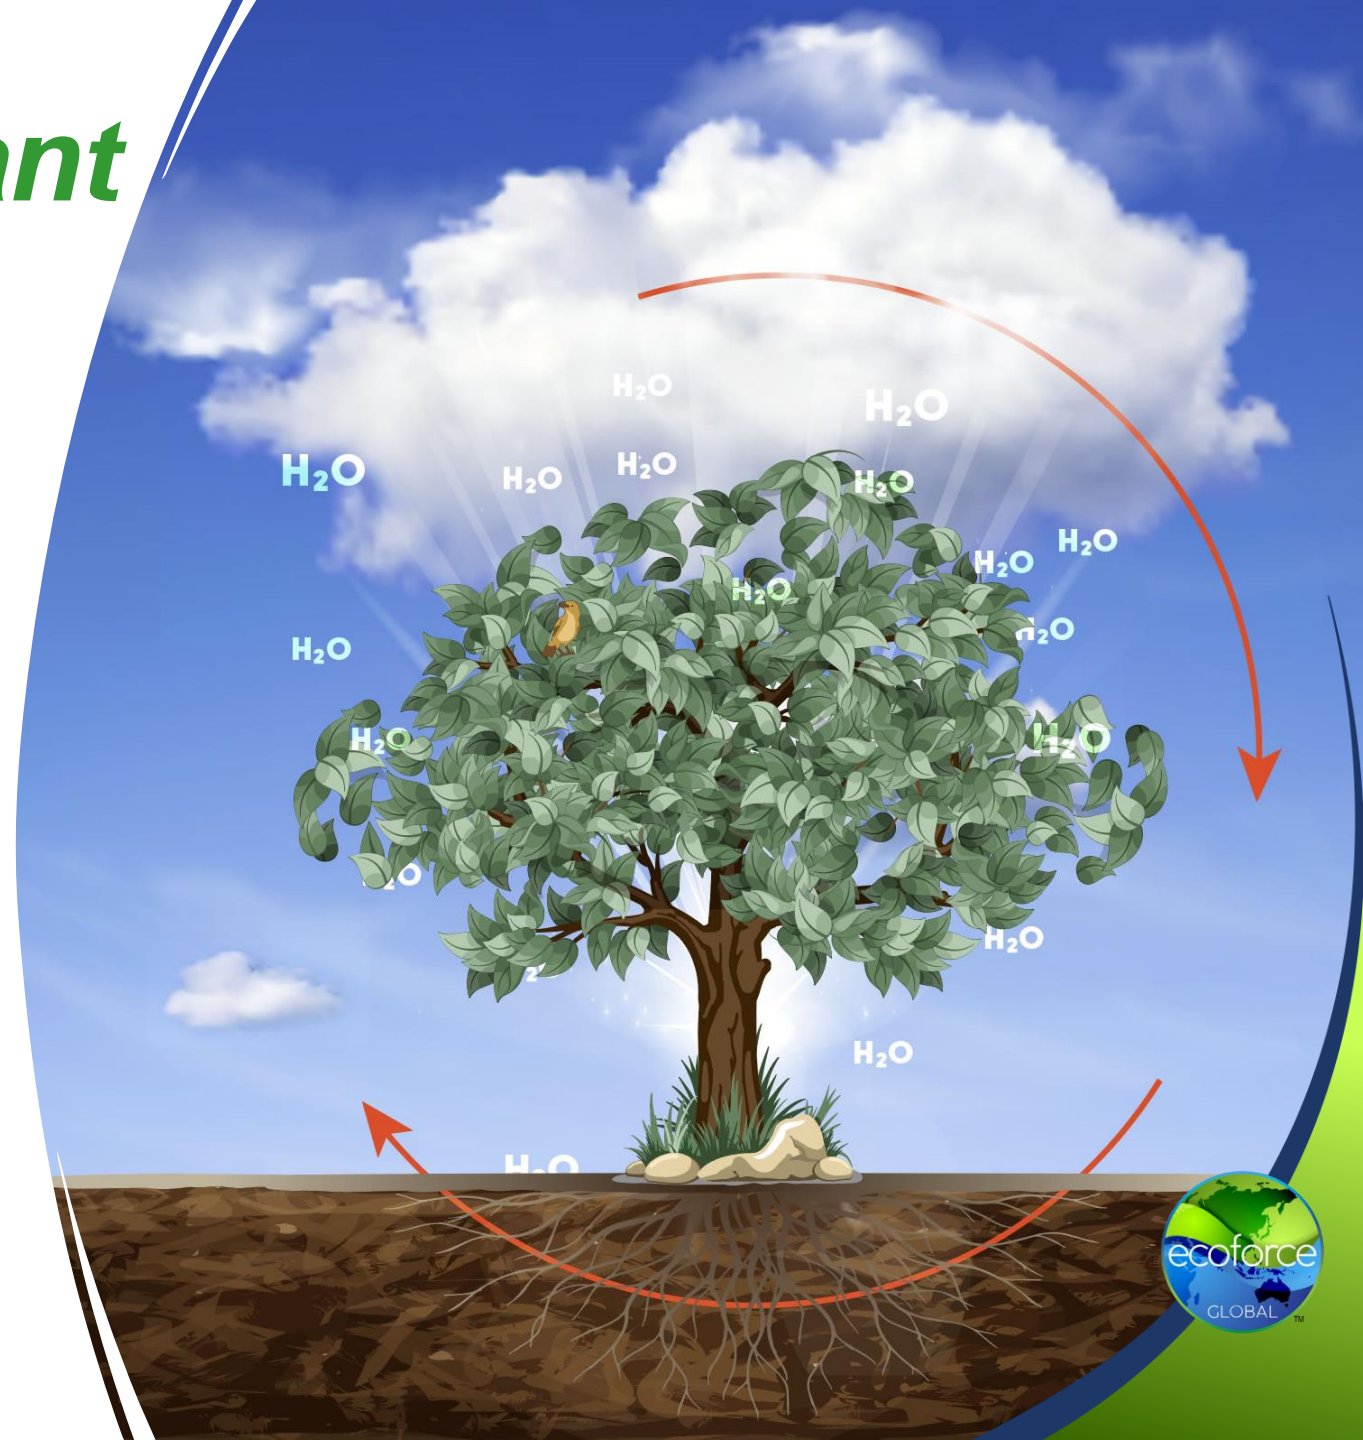

**PLANT 1 BILLION TREES by 2030**

# Why *trees* are *important* to *our planet*

## *What our participating **Farmers** are saying*

*“... the Tree Planting Project is an opportunity to regenerate some of our land effected by drought, flood and land erosion. ... The trees will also stabilise soil, minimising erosion into an adjacent natural waterway, improve the pasture, and help to restore the environment for wildlife.”*

*- John and Narelle Mcdonald,  
New South Wales, Australia*

## *What our participating **Farmers** are saying*

*“This project is important to us because it would help us fulfill so many of our goals for a healthy land ethic on this ranch. Firstly, it would greatly multiple the biodiversity of the land, radically transforming the future of the plant communities on the property.*

*... This project would also help reduce erosion of our precious soils as well as significantly reduce the carbon footprint of the property. ...”*

*- Matthew Cass, Queensland, Australia*

# *What our participating **Farmers** are saying*

*“... It is utterly important to me to get trees in the ground,  
and to care for them to get this process going and provide  
habitat for native fauna ...”*

*- Phil Chavanne, Texas, United States of America*

## *What our participating **Advocates** are saying*

*“The world is already experiencing changes in average temperature, shifts in the seasons, and an increasing frequency of extreme weather events, and other climate change impacts. We can mitigate climate change by reducing our emissions or by ... planting trees.*

*... I want to make an impact on my society to create a climate-resilient future for all of us.”*

*- Alawiyya Baba Musa,  
Nigeria, Africa*

# *What our participating **Advocates** are saying*

*“I’ve been concerned for a long time about the climate,  
and I see this as one way I can be involved in repairing  
the planet.”*

*- Elizabeth (Lizzy) Er,  
Queensland, Australia*

## *What our participating **Advocates** are saying*

*“... I have been determined to find an opportunity that will allow me to grow, learn, collaborate, and ultimately allow my family and I to truly own our lives. As an EcoForce Global Advocate I have found both!*

*My mission is to plant a forest of trees to nourish and regenerate the soil, create homes and shelter for wildlife, capture and store carbon, and emit fresh oxygen for us to breathe; but I cannot do it alone! ...”*

*- Karen Jansen, Victoria, Australia*
